* Represents extension beyond EOL Policy

All prior versions of Solera OS have reached EOL.

Security Analytics Software Product EOL

This section applies to software products with a perpetual license. Subscription-based software offerings are always supported during the life of the subscription.

Security Analytics Virtual Appliance Products

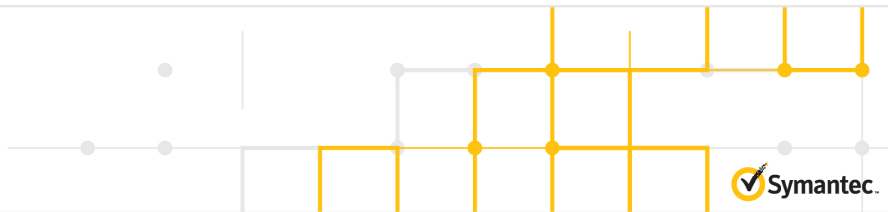

Security Analytics virtual appliances are only supported on defined virtual machine environments, as listed below. A current support agreement for the virtual machine environment is required for software support.

Security Analytics Software Products

Security Analytics software is a complete software stack for customer-provided hardware. As described in the [Blue Coat Systems Product Use Guide](#), software licenses are for use only on the specific Security Analytics platform instance for which the license was originally purchased. In other words, software licenses

may not be transferred to new hardware. Security Analytics software is only supported on defined hardware configurations, as listed below. A current support agreement for the hardware platform is required for software support. Once the hardware platform for which the license was purchased is no longer supported, the license product reaches EOL.

Security Analytics Storage Retention License Products

As described in the [Blue Coat Systems Product Use Guide](#), storage retention licenses are for use only on the specific (single) Security Analytics platform instance for which the license was originally purchased. In other words, storage retention licenses may not be transferred to new storage hardware. Security Analytics storage retention licenses are only supported with defined hardware configurations, as listed below. A current support agreement for the hardware platform is required for software support. Once the hardware platform for which the license was purchased is no longer supported, the license product reaches EOL.
